

# Proposed Electricians (Scotland) Bill

## Introduction

A proposal for a bill to provide for the protection of title and registration of electricians. The consultation runs from 19 August to 10 November 2020. All those wishing to respond to the consultation are strongly encouraged to enter their responses electronically through this survey. This makes collation of responses much simpler and quicker. However, the option also exists of sending in a separate response (in hard copy or by other electronic means such as e-mail), and details of how to do so are included in the member's consultation document. Questions marked with an asterisk (\*) require an answer. All responses must include a name and contact details. Names will only be published if you give us permission, and contact details are never published – but we may use them to contact you if there is a query about your response. If you do not include a name and/or contact details, we may have to disregard your response. Please note that you must complete the survey in order for your response to be accepted. If you don't wish to complete the survey in a single session, you can choose "Save and Continue later" at any point. Whilst you have the option to skip particular questions, you must continue to the end of the survey and press "Submit" to have your response fully recorded. Please ensure you have read the consultation document before responding to any of the questions that follow. In particular, you should read the information contained in the document about how your response will be handled. The consultation document is available here: [Consultation Document Privacy Notice](#)

I confirm that I have read and understood the Privacy Notice attached to this consultation which explains how my personal data will be used

## About you

Please choose whether you are responding as an individual or on behalf of an organisation. Note: If you choose "individual" and consent to have the response published, it will appear under your own name. If you choose "on behalf of an organisation" and consent to have the response published, it will be published under the organisation's name.

on behalf of an organisation

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

*No Response*

Please select the category which best describes your organisation

Commercial organisation (company, business)

Please choose one of the following:

I am content for this response to be published and attributed to me or my organisation

Please provide your name or the name of your organisation. (Note: the name will not be published if you have asked for the response to be anonymous or "not for publication". Otherwise this is the name that will be published with your response).

Gordon Eason Electrical

## Aim and approach

Q1. Which of the following best expresses your view of the proposed Bill?

Fully supportive

**Please explain the reasons for your response.**

As electricians we see all aspects of dangerous work and advice. This needs regulation as the public are giving and taking advice that they are unqualified to do so. Diy People buying cable and wiring sockets that they do t understand how they work. So using the wrong size of cable. Connecting up incorrectly. Not using the correct tools or erection methods. Fitting the wrong type of equipment causing fires and injuries.

Q2. What do you think would be the main practical advantages of the proposed Bill?

Electricians will be regulated and registered. Skills will need to be kept up to date so the best work will shine through

Q3. What do you think would be the main practical disadvantages of the proposed Bill?

We must stop diy shops selling cable and fittings to unqualified people.

Q4. Which of the following best expresses your view of the establishment of a single register for electricians?

Fully supportive

**Please give any views or comments on a single register and how it might be set up**

If we are all registered and located together then anyone needing to check they can do so in one place.

Q5. Which of the following best expresses your view of establishing protection of title for electricians?

Fully supportive

**Please give any views or comments either on the principle or practical operation of protection of title:**

This is a must. Why do women spend thousands on training, insurance tools and more to Cary out safe work. For an idiot to go to b&q and rewire a house?

## Financial Implications

Q6. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector		X				
(b) Businesses		X				
(c) Individuals		X				

**Please explain the reasons for your response**

Even if there is small costs that will go up so be it. How do you put a price on safety. Tho I can see no reason why costs should increase as if this stops the diy crowd and rouge traders then costs should come down

Q7. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

*No Response*

## Equalities

Q8. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex, sexual orientation?

Neutral (neither positive nor negative)

Q9. In what ways could any negative impact of the Bill on equality be minimised or avoided?

Stop allowing so called electricians to trade and make it compulsory to have be registered to practice. Canada America all run a similar way that works

## Sustainability

Q10. Do you consider that the proposed Bill can be delivered sustainably, i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

## General

Q11. Do you have any other comments or suggestions on the proposal?

I could name lots of individuals who think they are electricians and are nothing but downright dangerous. The public needs to be aware of this and urged to get on board. If it's made that the public will be fined or prosecuted for not using a regulated contractor then it will weed out the rouges
