

Proposed Electricians (Scotland) Bill

Introduction

A proposal for a bill to provide for the protection of title and registration of electricians. The consultation runs from 19 August to 10 November 2020. All those wishing to respond to the consultation are strongly encouraged to enter their responses electronically through this survey. This makes collation of responses much simpler and quicker. However, the option also exists of sending in a separate response (in hard copy or by other electronic means such as e-mail), and details of how to do so are included in the member's consultation document. Questions marked with an asterisk (*) require an answer. All responses must include a name and contact details. Names will only be published if you give us permission, and contact details are never published – but we may use them to contact you if there is a query about your response. If you do not include a name and/or contact details, we may have to disregard your response. Please note that you must complete the survey in order for your response to be accepted. If you don't wish to complete the survey in a single session, you can choose "Save and Continue later" at any point. Whilst you have the option to skip particular questions, you must continue to the end of the survey and press "Submit" to have your response fully recorded. Please ensure you have read the consultation document before responding to any of the questions that follow. In particular, you should read the information contained in the document about how your response will be handled. The consultation document is available here: [Consultation Document](#) [Privacy Notice](#)

I confirm that I have read and understood the Privacy Notice attached to this consultation which explains how my personal data will be used

About you

Please choose whether you are responding as an individual or on behalf of an organisation. Note: If you choose "individual" and consent to have the response published, it will appear under your own name. If you choose "on behalf of an organisation" and consent to have the response published, it will be published under the organisation's name.

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Please select the category which best describes your organisation

No Response

Please choose one of the following:

I am content for this response to be published and attributed to me or my organisation

Please provide your name or the name of your organisation. (Note: the name will not be published if you have asked for the response to be anonymous or "not for publication". Otherwise this is the name that will be published with your response).

John McGhee

Aim and approach

Q1. Which of the following best expresses your view of the proposed Bill?

Fully supportive

Please explain the reasons for your response.

I was astonished when I found out that people can call themselves electricians without being properly qualified

Q2. What do you think would be the main practical advantages of the proposed Bill?

It would ensure that only properly qualified people can out electrical work and get rid of the rogue traders

Q3. What do you think would be the main practical disadvantages of the proposed Bill?

None

Q4. Which of the following best expresses your view of the establishment of a single register for electricians?

Fully supportive

Please give any views or comments on a single register and how it might be set up

A single register would enable people to check that the person claiming that they were an electrician was an electrician

Q5. Which of the following best expresses your view of establishing protection of title for electricians?

Fully supportive

Please give any views or comments either on the principle or practical operation of protection of title:

This would give electricians the recognition their hard earned qualifications deserve and would hopefully encourage more people to train to become as electrician as there seems to be a shortage

Financial Implications

Q6. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector			X			
(b) Businesses			X			
(c) Individuals			X			

Please explain the reasons for your response

I wouldn't expect there to be any increase in costs as the bill being successful shouldn't have any impact on pricing

Q7. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

If you get rid of the rogue traders this will ensure that any work carried out will be done properly in the first place and not have to be fixed

Equalities

Q8. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex, sexual orientation?

Positive

Please explain the reasons for your response.

I think it could be positive as it could encourage different people to work in the industry

Q9. In what ways could any negative impact of the Bill on equality be minimised or avoided?

I don't see how there could be any negatives

Sustainability

Q10. Do you consider that the proposed Bill can be delivered sustainably, i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

Q10. Do you consider that the proposed Bill can be delivered sustainably, i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Please explain the reasons for your response.

We currently have trained electricians so this will give them the proper recognition so I can't see why there would be any disproportionate impacts

General

Q11. Do you have any other comments or suggestions on the proposal?

I would hope that this bill will be successful as it will ensure that the public can can an electrician and be safe in the knowledge that he/she is properly qualified and any work carried is done safely and to the relevant building regulations and standards
