

Proposed Electricians (Scotland) Bill

Introduction

A proposal for a bill to provide for the protection of title and registration of electricians. The consultation runs from 19 August to 10 November 2020. All those wishing to respond to the consultation are strongly encouraged to enter their responses electronically through this survey. This makes collation of responses much simpler and quicker. However, the option also exists of sending in a separate response (in hard copy or by other electronic means such as e-mail), and details of how to do so are included in the member's consultation document. Questions marked with an asterisk (*) require an answer. All responses must include a name and contact details. Names will only be published if you give us permission, and contact details are never published – but we may use them to contact you if there is a query about your response. If you do not include a name and/or contact details, we may have to disregard your response. Please note that you must complete the survey in order for your response to be accepted. If you don't wish to complete the survey in a single session, you can choose "Save and Continue later" at any point. Whilst you have the option to skip particular questions, you must continue to the end of the survey and press "Submit" to have your response fully recorded. Please ensure you have read the consultation document before responding to any of the questions that follow. In particular, you should read the information contained in the document about how your response will be handled. The consultation document is available here: [Consultation Document](#) [Privacy Notice](#)

I confirm that I have read and understood the Privacy Notice attached to this consultation which explains how my personal data will be used

About you

Please choose whether you are responding as an individual or on behalf of an organisation. Note: If you choose "individual" and consent to have the response published, it will appear under your own name. If you choose "on behalf of an organisation" and consent to have the response published, it will be published under the organisation's name.

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Professional with experience in a relevant subject

Please select the category which best describes your organisation

No Response

Please choose one of the following:

I am content for this response to be published and attributed to me or my organisation

Please provide your name or the name of your organisation. (Note: the name will not be published if you have asked for the response to be anonymous or "not for publication". Otherwise this is the name that will be published with your response).

James Mackie

Aim and approach

Q1. Which of the following best expresses your view of the proposed Bill?

Fully supportive

Please explain the reasons for your response.

Having worked in the industry for 25 yrs the quality of workmanship from diy is leading to dangerous situations becoming the norm. I was once told anything will work electrically, even two bits of wet string , but will it protect you in fault conditions. The problem is the customer only sees the item working and not whether it is safe.

I would say I now remove and replace as much as I install from scratch due to previous poor attempts.

Q2. What do you think would be the main practical advantages of the proposed Bill?

Increasing consumer safety and safety of those having to work upon previously wrongly altered systems.

Q3. What do you think would be the main practical disadvantages of the proposed Bill?

I can't see any other than a slight cost, which would be greatly outweighed by the cost of injuries and call outs from emergency services.

Q4. Which of the following best expresses your view of the establishment of a single register for electricians?

Fully supportive

Please give any views or comments on a single register and how it might be set up

Should be in form of Select checks upon individuals to prove there insurance etc

Q5. Which of the following best expresses your view of establishing protection of title for electricians?

Fully supportive

Please give any views or comments either on the principle or practical operation of protection of title:

To give a pride and fear that the installer needs carryout the work to relevant standards.

Financial Implications

Q6. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector			X			
(b) Businesses		X				
(c) Individuals		X				

Please explain the reasons for your response

Those on register would be willing to provide a competent service so would be charging appropriately. Cost to government would be offset by reduced fires and emergency call outs for burns etc.

Q7. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

No Response

Equalities

Q8. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex, sexual orientation?

Positive

Please explain the reasons for your response.

Making the profession a skilled workforce can only encourage all to better themselves or maintain there skills.

Q9. In what ways could any negative impact of the Bill on equality be minimised or avoided?

No Response

Sustainability

Q10. Do you consider that the proposed Bill can be delivered sustainably, i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

Q10. Do you consider that the proposed Bill can be delivered sustainably, i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Please explain the reasons for your response.

As time goes by and standards are achieved and become the norm , maintenance and renewal of botched work will become less thus making it sustainable

General

Q11. Do you have any other comments or suggestions on the proposal?

It amazes me it has taken this long for this to be heard. Working with electricity you can't hear it, or see it but it can kill you and yet there is no regulation. It seems wrong. Why can a gas fitter put a new boiler on test the gas with his gas registration then be allowed to wire the boiler with no knowledge of whether it is safe.
